

It's Easy to Get Started!

Looking for a healthy, beautiful smile? People of all ages can benefit from MicroArch. Its comfortable shape, small size and advanced design mean a better treatment process and better results for young people and professionals.

MicroArch[®]

The Mini Bracket with Style...

Straight teeth and a healthy smile are investments that last a lifetime. Be sure to speak to your orthodontist about the importance of good oral hygiene and maintenance of your braces throughout treatment. To find out if you are a MicroArch candidate, speak to your orthodontist to learn if this system is right for you.

The Science of Innovation. The Art of Patient Care.

The mini
bracket
with style.

MicroArch® for the Smile You've Always Wanted...

Approximately 30% smaller than traditional style brackets, MicroArch is attractive and subtle in appearance so that you can feel confident and self-assured while in treatment.

The system's low profile and ultra smooth finish ensures patient comfort and helps you better maintain good oral hygiene.

Best of all, MicroArch enables you to get a beautiful and healthy smile comfortably and less noticeably than before.

MicroArch

With its special rhomboid shape and sleek styling, MicroArch is 30% smaller than standard sized brackets.

Attractive Advantages

MicroArch enables you to improve your smile less noticeably than with standard sized brackets. Because the system has features that are specially engineered to work in balance with the shape of the natural tooth, the treatment process is optimized and results are lasting.

- Improved facial proportion and appearance
- Improved confidence with a beautiful smile and improved facial aesthetics
- Enjoy lasting results

Benefits of MicroArch

MicroArch brackets are made using high-quality steel- the strongest available. This means that while MicroArch appliances are very small, they are actually stronger than brackets constructed from less expensive materials. This same attention to quality is reflected in every aspect of this bracket's design and manufacture.

- 30% smaller than standard sized brackets
- Smooth finish for less irritation
- Low, sleek profile for greater comfort
